Food Packaging Aluminum Foil

Aluminum foil packaging has outstanding advantages in gas barrier properties, moisture permeability, hygienic safety, production efficiency, recyclability and environmental protection. Series 1, 3, 5 and 8 aluminum foils can all be used to manufacture aluminum foil for food packaging.

Aluminum foils for packaging bags are mainly including: 1060 aluminum foil, 1100 aluminum foil, 3003 aluminum foil, 8011 aluminum foil, 8021 aluminum foil, etc. Select the alloy tempers (softness and hardness) according to the needs of the packaged products, commonly used tempers are H14, H16 and H18.

Product Specification

Series	Alloy	Temper	Thickness(mm)	Width(mm)	Length(mm)
8***	8006,8011,8021	O,H14,H16,H18, H19,H24,etc.	0.014-0.2	20-1600	C
3***	3003,3004				
1***	1235,1060,1070,1100				

Advantages

1. Compared with plastic packaging, aluminum foil for food packaging does not release toxic substances at high temperatures and is safe and hygienic.
2. Aluminum foil for food packaging has high temperature resistance, good heat preservation, and oil resistance.
3. Compared with glass packaging, aluminum foil for food packaging has high mechanical strength, is not fragile, and is easy to transport and store.
4. Aluminum foil for food packaging is easy recycling, environmental protection, good light-shielding performance, water resistance, and high temperature resistance.

Application

Food packaging aluminum foil is commonly used in food packaging, pharmaceutical packaging, milk cover material, lunch box material, container foil, household foil, barbecue foil, beer sealing, bottle cap material, etc.

Coffee and tea

Instant drinks

Jams and cakes

Snacks, cookies

Sausages and jerky

condensed soup

Baby food

Ready-to-eat meals

The above mentioned aluminum product is produced according to national standard specifications. Please contact us for a free quote!
